

Evaluation Criteria for AI Contract Review

Use this checklist to guide your evaluation of any AI contract review tool. Your core guiding principles are performance, adaptability, and usability.

Validate Functionality

- Are suggestions accurate and aligned with your legal standards and playbook?
- Does the tool offer flexibility for different contract types and workflows, including first party and third party paper review?
- Does the AI support contract review across multiple languages?

Validate Configurability

- Does the vendor offer support in creating and refining contract playbooks?
- Can the AI learn from negotiations to improve recommendations?
- Can users provide feedback, and is the tool customizable based on input?

Validate Ease of Use

- Does the AI tool integrate seamlessly with platforms your team already uses, such as Microsoft Word?
- Is the tool intuitive and easy for legal teams to adopt and use?
- Is the AI scalable and capable of continuous improvement as your organization's needs evolve?
